Yueboda
Construction Machinery
Trade(Tianjin)Co.,Ltd.

ABOUT US

Yueboda Construction Machinery Trading (Tianjin) Co., Ltd. was established in 2013 and is headquartered in Tianjin, China. In its early years, the company focused on exporting construction machinery parts, excavator components, and used and new excavators. Leveraging professionalism and a forward-thinking approach, we quickly established a strong presence in the export business, maintaining our position as a leading foreign trader in Tianjin's excavator industry for many consecutive years.

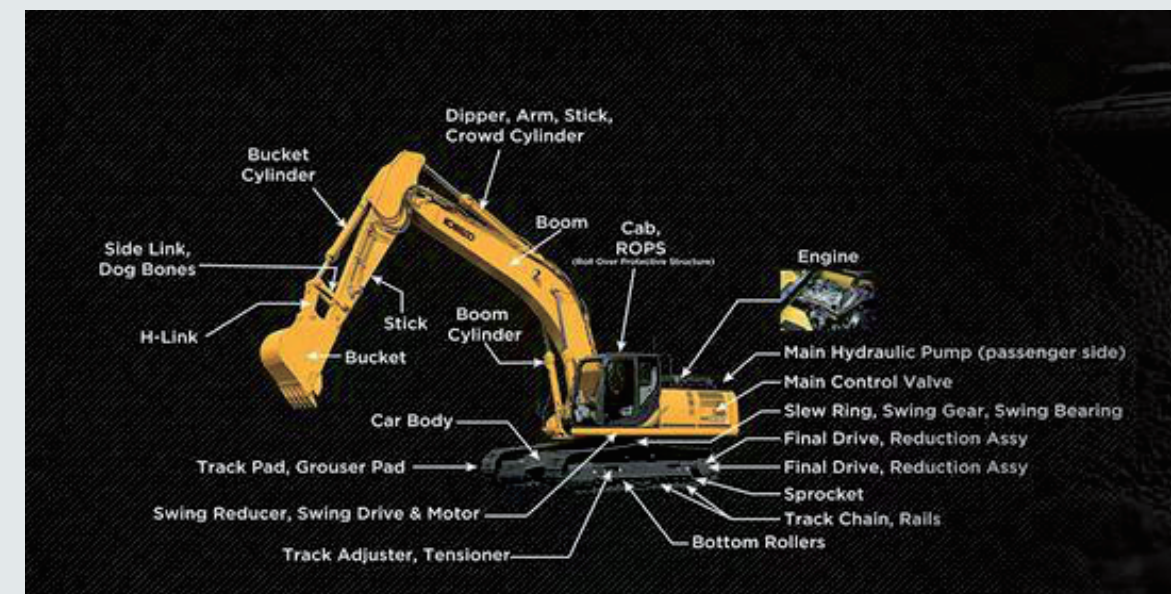

COMPANY FEATURES

Yueboda is committed to building a global "sustained supply chain integration platform for excavator parts and complete excavators," bringing together high-quality supply chain resources to promote the sustainable development of the excavator industry.

SALES CATEGORY

New and used excavators

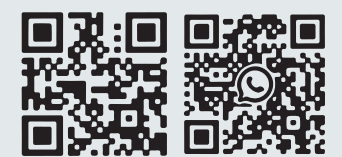

We provide full product coverage to meet any engineering scenario, including excavators, loaders, bulldozers, etc. Whether it is a new machine or a second-hand machine, we give you the most secure protection. Service upgrades allow you to buy with confidence and use with ease.

Construction machinery parts

With 13 years of experience specializing in construction machinery, we offer over 2,000 complete vehicle parts, covering hydraulic systems, transmission assemblies, electrical components, and consumable parts, truly delivering "knockdown-grade" parts supply.

PROVIDE PRODUCT BRAND

PROVIDE PRODUCT QUALITY

- 1

The quality of our product line is to provide a solution for replacing the original (OEM) domestic quality, achieving cost optimization while ensuring that performance meets the standards. The warranty policy adopts differentiated management to adapt to different working conditions
- 2

All parts come from original parts, retaining the original performance and compatibility, and refining the internal parts, striving to achieve a high degree of conformity and match with the new machine
- 3

All parts come from the brand's officially certified authorized dealers, ensuring that the products can be traced back to the original production line, such as Caterpillar, Komatsu and other international brands parts are in line with their global unified standards.

We provide services for used
excavators

108 testing system :

covering the engine, hydraulic system, chassis, electrical system and other core components, through the mechanical performance testing, oil testing, structural flaw detection and other multi-dimensional inspection to ensure that no accidental cars, soaking cars into the system

Data archiving :

The test results generate electronic reports and visualize the status of key components, providing an accurate basis for subsequent maintenance.

Dual-process cleaning :

High-pressure cold water rinses the dust accumulated on the surface, and neutral foam cleaner breaks down the stubborn stains to avoid corrosion of the car paint.

Rust prevention and strengthening :

Spraying rust preventive agent on key parts, combined with drying process, to extend the service life of metal parts.

Expert team :

Technicians with more than 10 years of experience lead the maintenance, combined with 13 years of parts database, to ensure the suitability and quality of parts.

Original standard :

We prioritize the use of brand-name original parts and high-quality domestic parts, and the key parts need to pass the load test after replacement.

VOC ComplianceSystem

Adopt water-based paint to reduce the emission of volatile organic compounds (VOC), which is in line with the national environmental protection standard.

We prioritize the use of brand-name original parts and high-quality domestic parts, and the key parts need to pass the load test after replacement.

Vprecision curing process :

Paint hardness reaches 3H level and UV resistance is increased by 40%.
